

ST. LAWRENCE FLUORSPAR PROJECT

Instrumentation Technician

Canada Fluorspar (NL) Inc. is seeking a highly motivated and team – oriented individual to join its team as an Instrumentation Technician.

Reporting to the Mechanical Supervisor, this position is based at the St. Lawrence Fluorspar Project on a five (5) days on/two (2) days off work rotation. This position will perform installation, maintenance, repair and optimization of field instrumentation and control valves.

The Instrument Technician will be responsible for:

- All operational aspects relating to instrumentation and control valves, including maintaining, repairing, replacing, and upgrading them in such a way that ensures production and availability targets are achieved
- Monitoring and evaluating technology to support continuous improvement objectives
- Optimizing performance of equipment by monitoring effectiveness and making recommendations
- Acceptance of instrumentation and control valves installations performed by Contractors as the owners' representative
- Assisting with the development of operating, maintenance, and training plans
- Developing and maintaining an instrumentation workshop facility

Interested candidates should possess a suitable qualification in the instrumentation field and ideally hold a valid Interprovincial Instrumentation Technician trade certificate. A minimum of five (5) years related experience is required. Advanced training in field instrumentation, Fieldbus systems, programmable (PLC) controllers and distributed control systems (DCS) along with strong communication and computer skills would be an asset. Experience in a similar position in the mining industry is preferable.

To apply, please forward a cover letter and resume by **July 7, 2017** to:
