

ST. LAWRENCE FLUORSPAR PROJECT

MAINTENANCE AND RELIABILITY LEAD

Canada Fluorspar (NL) Inc. is currently seeking an accomplished professional to take on responsibility to plan, lead and control all site maintenance activities (mobile/plant) at the St. Lawrence Fluorspar Project. This role is a great opportunity for someone who is looking to have a significant impact on the development and implementation of a maintenance management and cost control systems for a fluorspar project that is preparing to go into operations.

KEY JOB RESPONSIBILITIES:

- Provide leadership to all maintenance personnel, ensuring work is being completed in a safe, efficient and timely manner
- Oversee the preparation of short, medium and long-term maintenance plans to ensure they are in alignment with business objectives
- Coordinate resources to maintain and enhance critical equipment performance and availability through best business practices
- Recommend changes in standards, work methods, equipment, and process modifications to improve performance, productivity and/or profitability
- Coordinate maintenance upgrade programs and reliability improvement initiatives across the site
- Ensure maintenance schedules are followed to obtain the optimum production levels

SKILL & EXPERIENCE:

- Degree or diploma in a technical field, or possess a valid Interprovincial trade qualification certificate in a related field
- Minimum ten (10) years' maintenance and reliability experience in a heavy industrial or mining environment (preferably open pit and/or mineral processing production plant)
- Previous experience in a management and/or supervisory capacity is essential
- Excellent interpersonal, oral, and written communication skills including ability to effectively communicate and interact with all individuals with integrity, empathy and sincerity
- Strong planning, problem solving, troubleshooting, project management, and leadership skills

To apply, please forward a cover letter and resume by **October 15, 2017** to:
