

## ST. LAWRENCE FLUORSPAR PROJECT

# Control Room Operator

Canada Fluorspar (NL) Inc. offers an exciting and challenging opportunity for an individual to join its plant operations team as a Control Room Operator. The successful candidate(s) will be expected to work on a seven (7) day on / seven (7) day off work rotation, 12-hour shift.

Reporting to the shift Process Supervisor, this salaried position will be responsible for operating and continually monitoring all sections of the plant through a computer interface, DeltaV DCS. The primary focus is to operate the plant as efficiently as possible while monitoring plant performance to prevent issues from becoming downtime.

### DUTIES / RESPONSIBILITIES

- Assess production requirements and start or shutdown plant and equipment as per standard operating procedures (SOPs) and Safe Work Procedures (SWPs) to ensure optimum utilization of equipment
- Set and control Plant parameters and equipment to meet production objectives and maintain metallurgical performance
- Identify and monitor any changes to the process and coordinate the actions of the section operators to minimize plant delays, breakdowns and to ensure optimum usage of consumables
- Control and monitor systems throughout the plant, including the water treatment plant and tailings storage facility
- Assist section operators in diagnosing operational deficiencies and root cause of equipment defects using instrument indications
- Report on-shift activities and performance indicators with a focus on equipment availability and operation shortfalls and complete and maintain accurate daily logs
- Provide feedback to the management to improve and optimize any of the process units based on their performances
- Other duties as required

### EDUCATION / EXPERIENCE / SKILL

- Engineering Technology Diploma, concentration in Process, Chemical or other relevant discipline; Formal Trades education in a relevant discipline; Other relevant combinations of education and experience may be considered.
- Prior experience as a Control Room operator, with a background in mineral processing.
- Knowledge and experience operating a DeltaV DCS or similar process control system is a requirement
- A leader, quick learner, and creative problem solver who works well under pressure and adjusts quickly to change.
- Proven ability to motivate employees to work safely and achieve operational targets
- Strong verbal and written communication skills (computer skills covered in DCS)
