

## CANADA FLUORSPAR INC.

CANADA FLUORSPAR (NL) INC. is committed to acknowledging and valuing employee diversity and creating an environment in which every individual's strengths and abilities are developed and valued.

Canada Fluorspar Inc. (CFI) is developing and operating the St. Lawrence Fluorspar Mine in St. Lawrence, Newfoundland. Fluorspar is being mined from the AGS Vein, producing acid-grade concentrate, which is exported to domestic and international markets. The Fluorspar deposits are known for accessibility, high grade, and absence of impurities. Fluorspar supports 'green' initiatives and is used in Aluminum, Steel, Aerospace, Fire Extinguishing, Refrigerants, Lithium Batteries, Solar Panels and the production of hydrogen fluoride.

The effect that COVID-19 has had on every business has been profound. Many employers have had to reduce, reorganize or even suspend business activities. Some employees of these businesses have seen their jobs temporarily put on hold or reorganized out altogether while a very uncertain future prevails.

CFI recognizes that the nature of the economy in Newfoundland is such that a large number of highly skilled family breadwinners work on a fly in fly out rotational basis in other provinces and countries and that a number of you are currently in Province and could be considering finding employment on island.

As an essential business within the context of the Provincial guidelines CFI is open for business. We would like to indicate that although opportunities for immediate employment are not guaranteed we would like to reach out to anybody who is currently available.

We invite safety-minded individuals of all skill sets to take advantage of future career possibilities that may become available and consider building your future at CFI by becoming a member of our team if the opportunity arises.

If you are interested, please submit your resume/cover letter, clearly outlining your particular qualifications, skill set and experience. Please include your current mailing address, day-time contact number, e-mail address, as well as Job Posting Number.

CFI is currently seeking CV's for the availability of Technical and Skilled Trades.

- General Labourers (wide range of roles across the company operations)
- Skilled Trades Workers (Electricians, Welders, Mechanics, Millwrights)
- Heavy Equipment Operators (Excavator, Haul Truck, Front End Loader, Dozer, Fuel Truck)
- Process Operators (Mill Operations)

---

To apply, please forward a cover letter and resume by **12 p.m. on April 30th, 2020** to:

**POSTING #2020-011 – GENERAL**
