

ST. LAWRENCE FLUORSPAR PROJECT

Plant Engineer - Mechanical

Canada Fluorspar (NL) Inc. is seeking a quick-minded, bright and energetic individual to fill the role of Plant Engineer - Mechanical.

Under the general direction of the **Mill General Foreperson**, this position will assist the Maintenance team at Canada Fluorspar (NL) Inc., to design and implement industrial solutions. To do well in this role, you must be a licensed professional engineer and have experience as a mechanical engineer in a plant environment. This position will contribute to the Mill Maintenance team at the St. Lawrence Fluorspar Project.

DUTIES / RESPONSIBILITIES

- Assist the maintenance team in ongoing implementation and improvement of the preventative maintenance program.
- Read and review technical documents including equipment specifications, drawings, and manuals.
- Assist in the coordination of maintenance tasks including both routine and break-in maintenance.
- Generate and revise drawings and schematics as required.
- Assist the maintenance team in the procurement and coordination of spare parts and consumable materials.
- Generate and maintain various spreadsheets for equipment and component records.
- Contribute to the implementation and use of the CMMS for maintenance tasks.
- Apply engineering principles to various maintenance and reliability challenges.
- Contribute to team effort by accomplishing related results as needed.
- Other duties as required.

EDUCATION / EXPERIENCE / SKILL

- Bachelor of Engineering Degree (Mechanical) with a minimum of 5 years of work experience
- Registered with the Association of Professional Engineers and Geoscientists of Newfoundland and Labrador
- WHMIS training is provided.
- Valid driver's license

To apply, please forward a cover letter and resume by **5:00 P.M. on Monday March 15th, 2021** to:
