

ST. LAWRENCE FLUORSPAR PROJECT

Process Engineer

Canada Fluorspar (NL) Inc offers an exciting and challenging opportunity for a highly motivated and enthusiastic individual to join its Mill Maintenance team for a six-month term, as a Process Engineer.

This Position will report directly into the Mill General Foreperson. The successful candidate will play a significant role in maximizing Fluorspar production, reducing mill costs, and improving the mill safety record. The successful candidate will be expected to work a 5 day on / 2 day off work rotation, 8 hour shift.

Key Job Responsibilities:

- Daily mill production monitoring and reporting.
- Working with vendors in the industry to engage in Continuous Improvement projects in terms of Product Quality, increased production and cost reductions.
- Assist operations with mill related activities
- Assist Operations with equipment selection and improvements.
- Maintain a safe and efficient work environment.
- Design chemical or mineral experiments that have an impact on Fluorspar production, costs, or safety.
- Identifies new equipment, develops user requirement specifications.
- Project Management for implementation of complex processing equipment.
- Supports improvements, training, troubleshooting and complaint investigation of equipment.
- Creates or provides technical input into protocols / reports for equipment commissioning and qualification.
- Executes/Provides Technical Support to equipment assessments, Engineering Trials and Feasibility batches.
- Develops Standard Operating Procedures for new equipment.
- Liaises with functional areas (including clients and vendors) to meet project objectives.
- Other duties as required.

CFI is an equal opportunity employer. We encourage all qualified applicants to apply. We thank all applicants for their interest, however, only those considered for an interview will be contacted.

Skills & Experience:

- Mineral Process, Metallurgy or Chemical Engineering graduate or Equivalent
- Minimum of two (2) years mineral processing production plant experience preferred.
- Experience with flotation and grinding considered an asset.
- Advanced computer skills.
- Developed interpersonal skills.
- Good oral and written communication skills.
- Excellent decision making, problem solving and priority setting skills.
- Handle multiple projects with tight timelines.
- Must be able to lift 10 lbs with each hand and up to 50 lbs with both hands.
- Self-motivated and able to work with minimal supervision.
- Interested candidates must possess a valid driver's license.
